LONDON MATHEMATICAL SOCIETY
EST. 1865

Advancing, disseminating and promoting mathematical knowledge

PUBLICATIONS

12 journals and **2** book series

with all net income providing **support for mathematics**

GRANTS

Over **190** grants awarded per year totalling over **£700k**

LMS MEMBERSHIP

Over **3,000** members

A **global membership** from **over 60 countries**

www.lms.ac.uk/membership

MATHEMATICAL SCIENCES DIRECTORY UK

Connect, communicate, collaborate.

Join the 6,000 mathematicians already registered

www.lms.ac.uk/msdirectory

LMS LECTURESHIPS AND MEETINGS

Over 30 meetings per year on a range of mathematical research areas and providing funding for international lecturers to visit the UK

COLLABORATING WITH OTHER ORGANISATIONS

Working internationally for the benefit of mathematics

DEVELOPMENT

Ensuring the **financial foundation** of the Society for **future generations**

PRIZES

Recognising **achievement** in mathematics including the De Morgan Medal

PROMOTING MATHEMATICS

Promoting events, lectures and activities to the wider **mathematical community**

13,000 followers on **Twitter** and **3,500 You Tube** subscribers

EARLY CAREER RESEARCHERS

Supporting Research Schools, Graduate Student Meetings and Postgraduate Conferences across the UK

WOMEN IN MATHEMATICS

Committed to **equality** across mathematics

RESEARCH NETWORKS

Providing **financial support** for **35** joint **research groups** working with collaborators across **Europe and beyond**

REPRESENTING AND INFLUENCING

Representing the **mathematical sciences community** in government and with decision makers

LONDON MATHEMATICAL SOCIETY

ABOUT THE LMS

The London Mathematical Society (LMS) is the UK's learned Society for mathematics. Its purpose is the advancement, dissemination and promotion of mathematical knowledge, both nationally and internationally. The Society receives its resources through publishing, investments, membership fees and endowments. Such activities are vital for the continued health of mathematics as a discipline, which is critical to the UK economy and which impacts on a wide range of societal activities. The Society's international publications are critical to the delivery of its charitable activities in the advancement and support of mathematics and the wider mathematical research community. All surplus income from the LMS publications is used entirely to support mathematicians and mathematics research.

The LMS is a Society with a tradition that spans more than 150 years and a membership that includes many creative mathematical scientists, both past and present. Through its publications, meetings and other charitable activities the Society has, over the years, helped to communicate historically decisive contributions in all areas of mathematics. Maxwell, Lord Rayleigh, Turing, Hodge, Ramanujan, Cartwright and other eminent mathematicians have all published in LMS journals. The Society works both nationally and internationally on behalf of all types and levels of mathematics, across research, education and industry, and recognises the importance of engaging with and directly involving wider users and owners of mathematics such as industry, finance, entrepreneurs and politicians.

The London Mathematical Society
De Morgan House
57-58 Russell Square
London WC1B 4HS
